Lab 8: Student Enrollment Web App

Worth 300 points (3 labs)

Work on it in project teams (3-4 people)

3 weeks to work on it

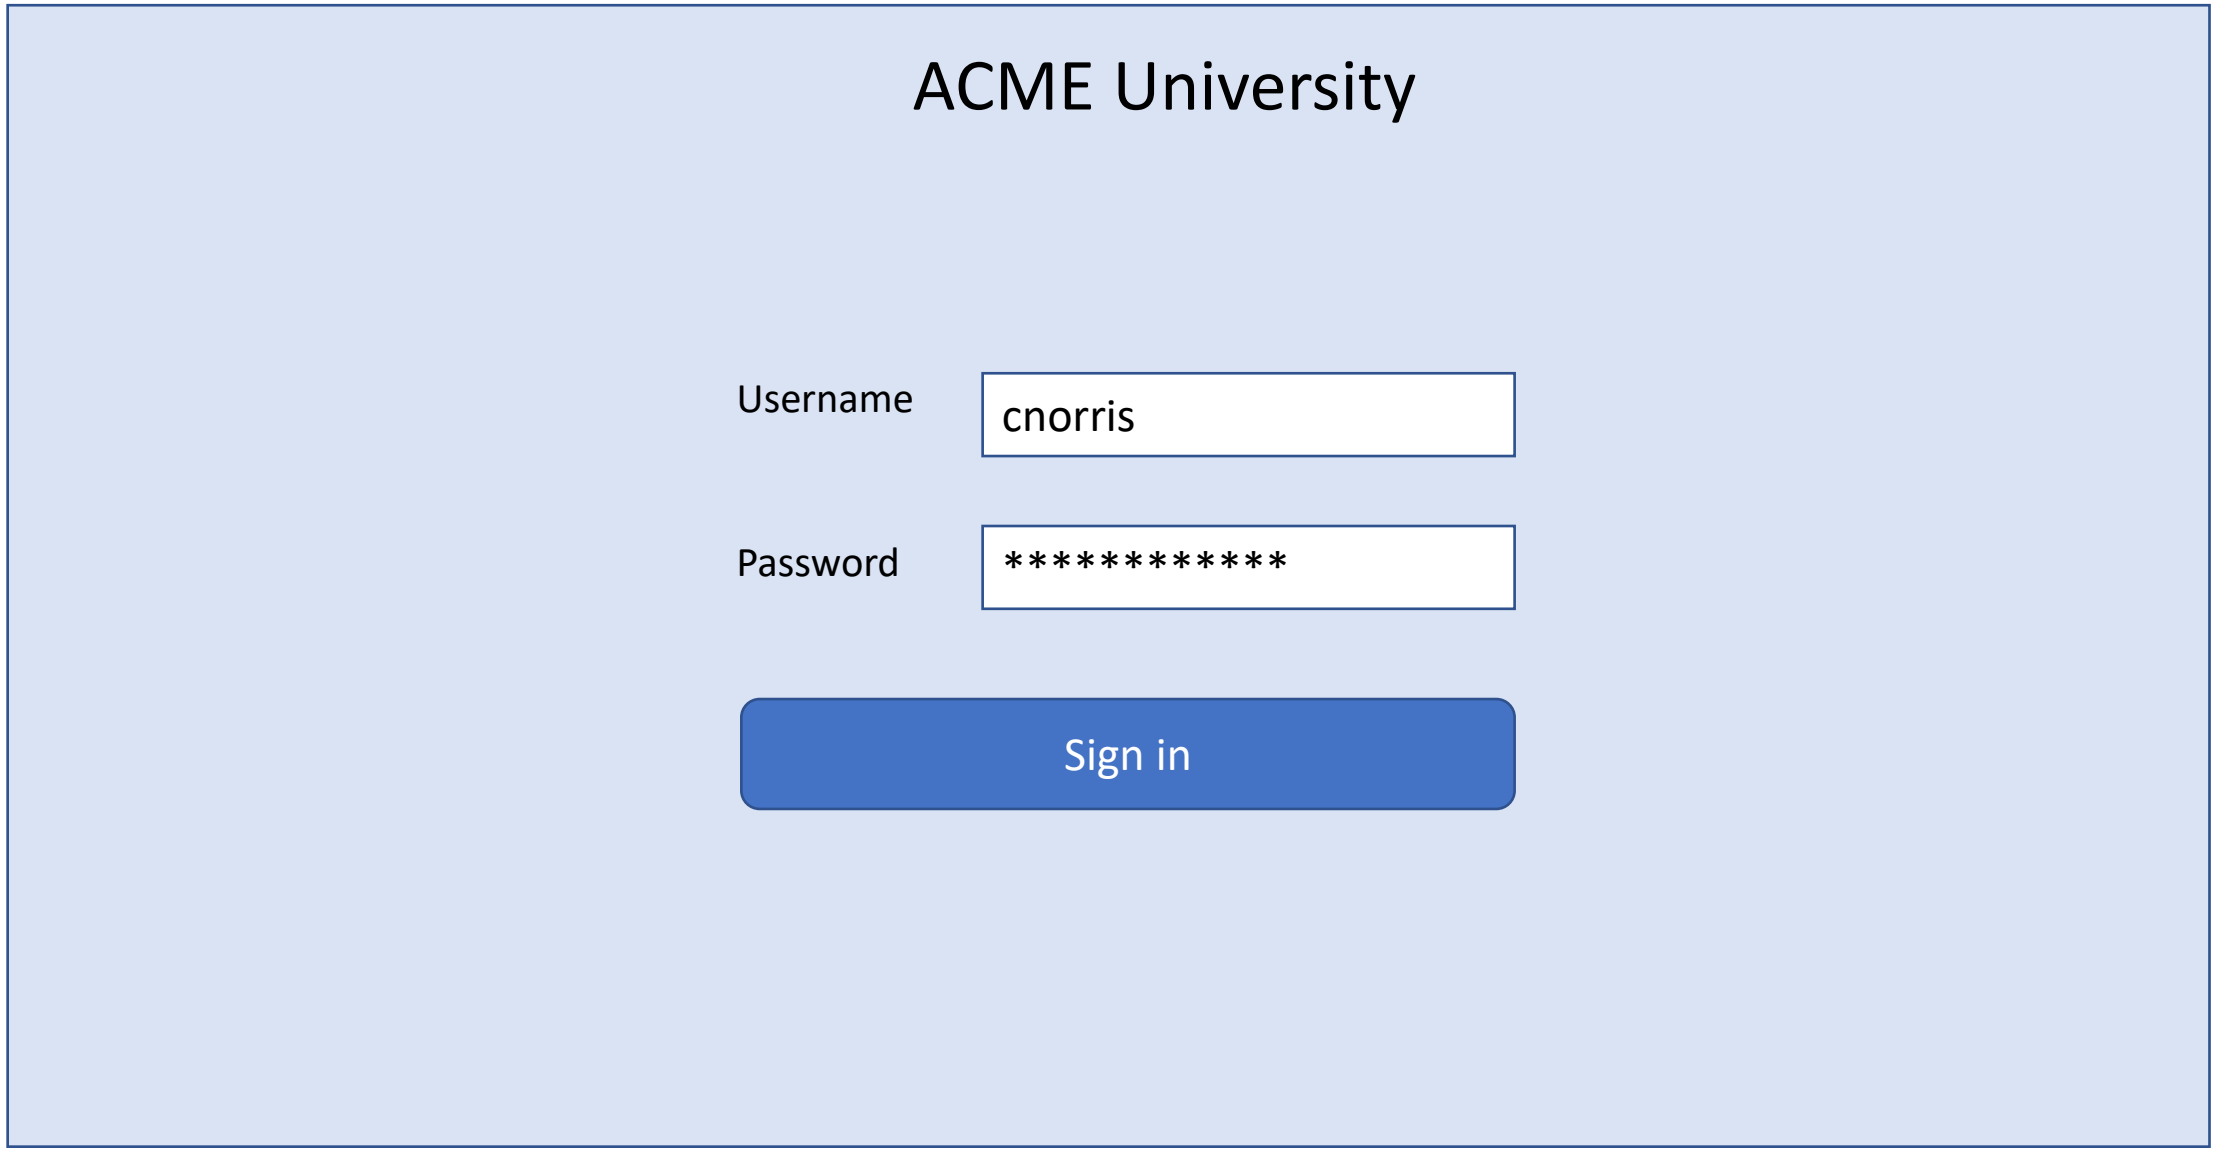

Group presentation given in lab session

Basic Requirements

- Front end in React or Vanilla JS
- App server in Flask or similar Python web framework
- Data stored in a SQL database (MySQL, Postgres, etc.)
- User login that handles student, teacher, and admin roles

As a student I can…

- Log in/out of app
- See all my classes
- See all classes offered by school
- See number of students in class
- Sign up for a new class (if the class has not reached capacity)
- Drop a class that you are enrolled in

Editable

As an admin I can…

- Create, read, update, delete all data in database

- Note: You can implement an admin page with Flask-Admin
